Additional Notes or Comments:	
<p>We are a very active non-profit that is eager to get more families playing together. We host play for people of all ages. We have grandparents that play with their grandchildren and parents that play with their children. This is a very accessible sport that most anyone can acquire enough skill to play including those left out because they may not be very athletically inclined. We are a very inclusive association and do not require anyone to join our association to learn or be a part of the pickleball community we are growing in the area. Thank you for your support and assistance as we strive to reach all who want or need this in their lives.</p>
